

## **W17EA-D CH.17 MINOR CP MOD APPLICATION**

The herein proposed Minor CP Mod application for W17EA-D Construction Permit (CP), proposes no other change, except the rotation of the antenna pattern from 180° to 0°N. As shown in the attached TVStudy, performed with a L-R cell size of 0.5 km and a L-R profile increment of 0.1 km, no prohibitive interference is caused to any other facility. The proposed change will increase the coverage area of W17EA-D, and thus it is believed it serves the public interest.
