

**RF Exposure Statement  
WRBW Orlando, FL  
Repacked Channel 28**

The facility proposed in this application is identical to the replicated post Incentive Auction facility described in the repacking notification sent to the station. The facility replicates the currently authorized facility and will operate at 1.14 dB lower power (dipole factor adjustment); therefore, in that the current facility was previously determined to be well below the RF exposure limit requirements the proposed facility is also expected to comply with the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
