

Tribune Broadcasting Hartford, LLC
WCCT-TV, Waterbury, CT
DTV Engineering STA Extension Request

Exhibit 1

WCCT-TV, Waterbury, CT, which is subject to the FCC repacking process and is part of the Phase 4 transition group, filed for and received special temporary authority to operate on a side mount location of the current tower to allow for completion of construction and modification of the repack facilities for eventual operation on Channel 33 (the station currently operates on Channel 20). *See* File No. 0000059403. Additional time is needed to complete the necessary tower work, and therefore an extension of the above-referenced STA is respectfully requested.

The previous coverage map and technical summary are attached. As shown, the requisite coverage to the Waterbury market will continue and therefore granting this STA will serve the public interest by allowing WCCT-TV to maintain an important over the air service while continuing its required repack construction obligations.
