

**WFGC, Palm Beach, Florida (Fac. Id. 11123)
Construction Permit Extension Request**

Because of new paperwork requests from Palm Beach County permitting authorities seeking further information from the antenna manufacturer, and the consequential delay in issuance of a work permit, the tower crew scheduled for WFGC's post-auction Channel 7 top-mount antenna installation no longer has sufficient time to prepare and mobilize in order to meet WFGC's Phase 2 deadline of April 12, 2019.

WFGC has obtained a temporary side-mount Channel 7 antenna, and concurrent with the filing of this extension request, has filed a request for special temporary authority to commence reduced power/coverage Channel 7 operations no later than April 12, 2019 (LMS 0000068464). WFGC will cease operations on its pre-auction channel 49 no later than April 12, 2019. The temporary operation on Channel 7 will allow WFGC to operate on its post-auction channel until the work permit is issued and the tower crew can complete the top-mount antenna installation. The channel 7 transmitter is being installed in late March and will be used with the temporary channel 7 antenna. WFGC anticipates that construction of its permitted Channel 7 facilities in accordance with construction permit LMS 0000034361 will be completed within the six-month extension period.

Upon grant of the STA, WFGC will send amended MVPD notices regarding the alternate STA Channel 7 operating parameters commencing April 12, 2019. Viewer notifications will continue as scheduled.
