

## **Request for Fourth Extension of Special Temporary Authority for WNJU**

WNJU, Linden, New Jersey (FIN 73333) ("WNJU") is currently authorized to operate on its pre-auction RF channel 36 alternately, on an as needed basis, from (1) the upper antenna located at One World Trade Center ("1WTC") under special temporary authority (File No. 0000060306) ("Upper Antenna STA");<sup>1</sup> and (2) the lower antenna located at 1WTC under special temporary authority (File No. 0000067708) ("Lower Antenna STA").<sup>2</sup> Flexibility for WNJU to alternate operations from the lower and upper antenna, vice versa, is necessary during the repack transition to allow work on the 1WTC antennas and combiner systems, and to accommodate the needs of the other stations located at 1WTC.<sup>3</sup>

Accordingly, WNJU respectfully requests that the FCC grant this fourth request for an extension of the Upper Antenna STA so that WNJU may continue to serve its viewers while it coordinates with the co-tenants of the master antenna system at 1WTC during this post-auction repack transition period.

---

<sup>1</sup> The Upper Antenna STA, authorizes WNJU to operate at reduced power utilizing the non-directional antenna installed at 1WTC at 530.4 meters AMSL with an effective radiated power of 340 kW, was initially granted by the FCC on April 13, 2017 (File No. 0000022605) and extended by the FCC on October 5, 2017 (File No. 0000030495), April 3, 2018 (File No. 0000049530), and October 12, 2018 (File No. 0000060306).

<sup>2</sup> The Lower Antenna STA, granted by the FCC on March 5, 2019, authorizes WNJU to operate at reduced power utilizing the non-directional antenna installed at 1WTC at 506.0 meters AMSL with an effective radiated power of 415 kW.

<sup>3</sup> WNJU (and commonly owned sharee station WNBC (FIN 47535)) has an outstanding construction permit authorizing construction of its post-auction RF channel 35 facility on the lower antenna at 1WTC at 506.0 meters AMSL with an effective radiated power of 575 kW (File No. 0000053139).
