

TECHNICAL EXHIBIT
DISPLACEMENT FILING TO CORRECT ERRONEOUS APPLICATION
FOR LPTV STATION

FACILITY: K21NY-D, FI 19154
FALLON, NV
DEERFIELD MEDIA (RENO) LICENSEE LLC
Existing FCC file number 0000054905 (CP)

The subject CP was granted pursuant to the LPTV/Translator displacement/filing window of 2018/19 arising from the incentive auction 600 MHz TV band repack. It was filed to change the facility from channel 42 to channel 21D. The filing was done in error as the engineer had not been given information about all incoming channels at the site. one of which is channel 21.

Upon learning this, we are filing the instant application to be changed to channel 34D, FULL SERVICE mask, 0.6 kW ERP. Antenna make and model is ERI model AL8 OC which is to be located on ASR 1272066 at 6.6 m AGL; orientation N/D. NIER is less than 5% of the limit for this service; no new tower construction or changes are planned. In keeping with the original plan, RF hazard warning signage and appropriate access limits are employed.

Using the specified equipment, pattern and ERP, the application is in compliance with all pertinent portions of §74.793 with respect to all other existing part 73 and part 74 licenses, permits and applications known as of the time of filing; however, as a station in the LPTV or TX service which is displaced into the core or otherwise required to modify its facilities in accordance with the presence of an incoming repacked full service station assigned to its previous channel, the within applicant agrees, if necessary, to not operate on the channel or with the service proposed in the within application until any potentially mutually interfering repacked full service station or stations have left their channels pursuant to the relevant phase assignment(s). The within applicant agrees to accept up to 2.5% incoming interference from BNPDTL-20090825ANI.
