March 19, 2019

Modification of construction permit BLDTT-20140609AAO.

This modification request would change the specified antenna from make DIE model TLP-F to a DLP-D. The pattern change will reduce double coverage with KHQ's primary facility on channel 15 but increase coverage to the north of the translator that is terrain shielded from KHQ's primary facility and not currently covered by the translator.

According to TVstudy this modification does not increase interference to any existing or authorized repack facilities.

Respectfully:

A handwritten signature in black ink, appearing to read 'Tony Austin', written over a horizontal line.
