

W18DZ-D MINOR LICENSE MOD APPLICATION

The herein proposed Minor License Mod application for W18DZ-D proposes a relocation to a nearby site 0.36 miles apart, a change in antenna pattern and an increase in ERP. As shown in the attached TVStudy, performed with a L-R cell size of 0.5 km and a L-R profile of 0.1 km, no prohibitive interference is caused to any other facility. The proposed change will increase the coverage area and population of W18DZ-D and thus it is believed will serve the public interest.
