

**WPCB, Greensburg, PA (Fac. Id. 13924)**

**Engineering STA Justification  
Post-Auction Channel 28**

WPCB's tower crew has advised that due to tight scheduling and likely delays on earlier scheduled tower jobs, it cannot guarantee the installation of WPCB's top mounted channel 28 antenna prior to the August 2, 2019 Phase 4 deadline as authorized in post-auction construction permit LMS 0000034177.

WPCB has obtained the specifications for a channel 28 antenna that can be side-mounted and operated at lower power in the event the permitted antenna cannot be installed on time. WPCB requests special temporary authority to operate with reduced channel 28 facilities as specified herein commencing during the Phase 4 testing period beginning June 22, 2019. This STA will enable WPCB to cease operations on its pre-auction channel 50 no later than August 2, 2019, the end of Phase 4.

Simultaneous with this filing, WPCB has filed a request to extend its post-auction channel 28 permit.
