**RE: AVAILABILITY OF AMERICAN TOWER'S BROADBAND UHF TV  
ANTENNA AT JOHN HANCOCK CENTER IL**

Dear Mr. Stoner:

This letter confirms that American Tower's broadband UHF TV antenna at the John Hancock Center located at 875 North Michigan Avenue, Chicago, IL 60611 was planned for use by stations originally assigned to Phase 8 of the Federal Communications Commission's Transition Plan. This antenna will have sufficient capacity to enable Univision to connect to, and operate, WGBO Channel 35 in Phase 6 without delaying any other station's transition at the John Hancock Center.

Sincerely,

Peter Starke  
V.P., Broadcast
