

All documents required to be placed in the online public file were uploaded on a timely basis except for the following:

**Political File**

All requests for political advertisements were timely uploaded in the Station's online public file. However, upon review, the licensee discovered that certain requests were missing the disposition affidavits. These affidavits have now been uploaded.

In addition, certain non-candidate issue advertisements do not include information about the officers and/or board members of the party requesting the advertisement. Although the licensee made considerable efforts to obtain this information, it was only able to include what was provided.

Station personnel responsible for these documents have been diligent in consistently ensuring that the political advertisements are uploaded on a timely basis. These personnel have been reminded that the disposition affidavits also need to be uploaded following airing of the advertisements and procedures have been implemented to ensure that these documents are timely placed in the Station's political file in the future.
