

**General Information Exhibit**

This exhibit is to advise the Commission that as of June 6, 2019, KRDO-TV is operating at reduced power as a result of a failure within the station's primary transmitter. Initially, the station was operating at approximately 67% power or 134 kw ERP. Following work on the transmitter, the station was able to increase power above 80%. As of and since June 18, 2019, the station is operating at approximately 91% power or 182 kw ERP. The licensee is anticipating a visit from the vendor in order to inspect the transmitter to address the problematic part.
