

Explanation of Antenna Location Responses

The correct answer to the question, “Do you have an FCC Antenna Structure Registration (ASR) Number is **“Yes”**”.

The ASR Number is **1219481**.

When the applicant indicated yes, there is an ASR and entered the ASR number, the LMS system pre-filled the “Support Structure Height” field with “0.0” and does not allow a change to the response.

Because the LMS system would not allow the application to be filed with a 0.0 value, the ASR number was left out.

The heights listed in this form correspond to those listed in ASR Number 1219481.
