

**RF Exposure Statement
WYFX-LD Youngstown, OH
Channel 32**

The facility proposed in this application will operate with an effective radiated power (ERP) of 15 kW and a center of radiation 378.8 meters above ground level (AGL). An analysis of the radiation level at 2 meters AGL indicates the RF exposure level would be well below the allowable limit for an uncontrolled area and therefore meets the requirements. Please note that this computation also considered a 100% vertical component. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
