

DESCRIPTION OF APPLICATION

KSBB-CD currently operates using ATSC 3.0 with the parameters specified in the instant application pursuant to its ATSC 3.0 experimental special temporary authority in FCC File Number 0000058567 (the “STA”), which expires on August 27, 2019. The purpose of the instant application is to apply for permanent modification of KSBB-CD’s license for ATSC 3.0 now that the Media Bureau is accepting such applications.

As KSBB-CD has already commenced ATSC 3.0 and ATSC 1.0 simulcast service pursuant to the STA, the “Commencement of Service Date(s)” section of the instant application is not applicable. The date provided in the required responses reflects the expiration date for the STA.

Similarly, the Applicant already complied with the consumer education requirements prior to commencement of ATSC 3.0 operations under the STA. Further, as indicated in the Applicant’s STA request, KSBB-CD is not carried by any MVPDs and, as such, the MVPD notice requirements are not applicable.

To the extent necessary, the certifications made in the instant application are qualified by the foregoing.
