

Reason for Request for Extension of STA

The licensee seeks extension of the outstanding STA to operate this displaced translator on Channel 4 with a used antenna. After substantial delay it has just this week received authorization from the owner of the tower to install the STA antenna. Meanwhile, the licensee has abandoned its plan for the fabrication of a complex antenna that would exactly replicate the previous antenna pattern. It plans now to install and test the STA antenna within the next few weeks and if coverage is satisfactory, to file an application to modify the underlying Channel 4 construction permit to specify the STA antenna.
