

KRMZ, Steamboat Springs, Colorado  
Request for Silent STA

KRMZ rebroadcasts the signal of KRMA, Denver, Colorado, as delivered by satellite. The satellite service vendor, Comcast, has changed satellites and changed its encryption/decryption encoding. The station has been silent since this change occurred. KRMZ ordered a new satellite receiver, but upon delivery, KRMZ determined that the new receiver was not functional. The station expects to receive a replacement unit soon. Once the new equipment is in hand, the station will schedule a tower crew to install the new unit. KRMZ will notify the FCC once it is able to receive the signal of KRMA and return to the air.
