

Delmarva Broadcast Service, LLC, the former licensee of WEVD-LP, was originally granted special temporary authority in 2010 (BSTA-2009117ADH) to operate the station using a replacement transmitter and with reduced ERP. When Marquee Broadcasting, Inc. acquired the station in 2013, its request to continue the extension of this STA was granted to give Marquee the opportunity to evaluate its long term plans. In light of the digital transformation for LPTV stations, the impact of the repack due to the FCC's spectrum auction, and the election of its digital channel, Marquee hereby requests the further extension of this STA to allow continued operation with reduced analog ERP and temporary facilities to provide adequate time to implement the Channel 3 digital facilities authorized by the associated digital companion facility (WEVD-LD).
