WTTW(TV), Chicago, Illinois Reduced Power STA Request September, 2019

WTTW(TV), Chicago, Illinois, has been operating from its licensed Channel 47 auxiliary facility (see BXPEDT-20040113ABK) since August 30, 2019, at approximately 40% of authorized power for that facility. As the station will be transitioning to operations from new facilities on its post-repack channel on October 18, 2019, the station does not intend to attempt to repair the equipment issues that are causing the reduced power operations.
