

CONSTRUCTED POST-TRANSITION FACILITY

The WAWV-DT Channel 18 post-auction facility was built-out pursuant to the underlying construction permit (File No. 0000028343) with the exception that the station will operate with a Dielectric model TUA-O4-16/64H-R-1-T antenna instead of the authorized Dielectric model TUA-O4-16/64H-1-R antenna. The TUM25-04-16/64H-R-1-T and TUM25-04-12/48U-2-R antennas are both nondirectional and therefore have the same azimuth patterns. Due to tower modifications that were required to strengthen the support structure, the 293.8 m AGL antenna height radiation center authorized in the underlying post-auction construction permit is decreasing by 0.9 m to an actual antenna height radiation center 292.9 m AGL as depicted in Exhibit 1 (Tower Elevation View). The 0.9 m reduction in height is being requested via this license application to cover the WAWV-DT Channel 18 post-auction construction permit pursuant to Section 73.1690(c)(1) of the FCC Rules since the change is within the ± 4 m threshold. The F(50,90) 39.15 dBu protected noise limited contour is essentially unchanged as can be seen in the map below and the attached TVStudy demonstrates that the slight height reduction in radiation center will not result in impermissible interference to any station.

SPECIAL CONDITIONS SATISFIED

All other special conditions depicted in the underlying construction permit have been satisfied.

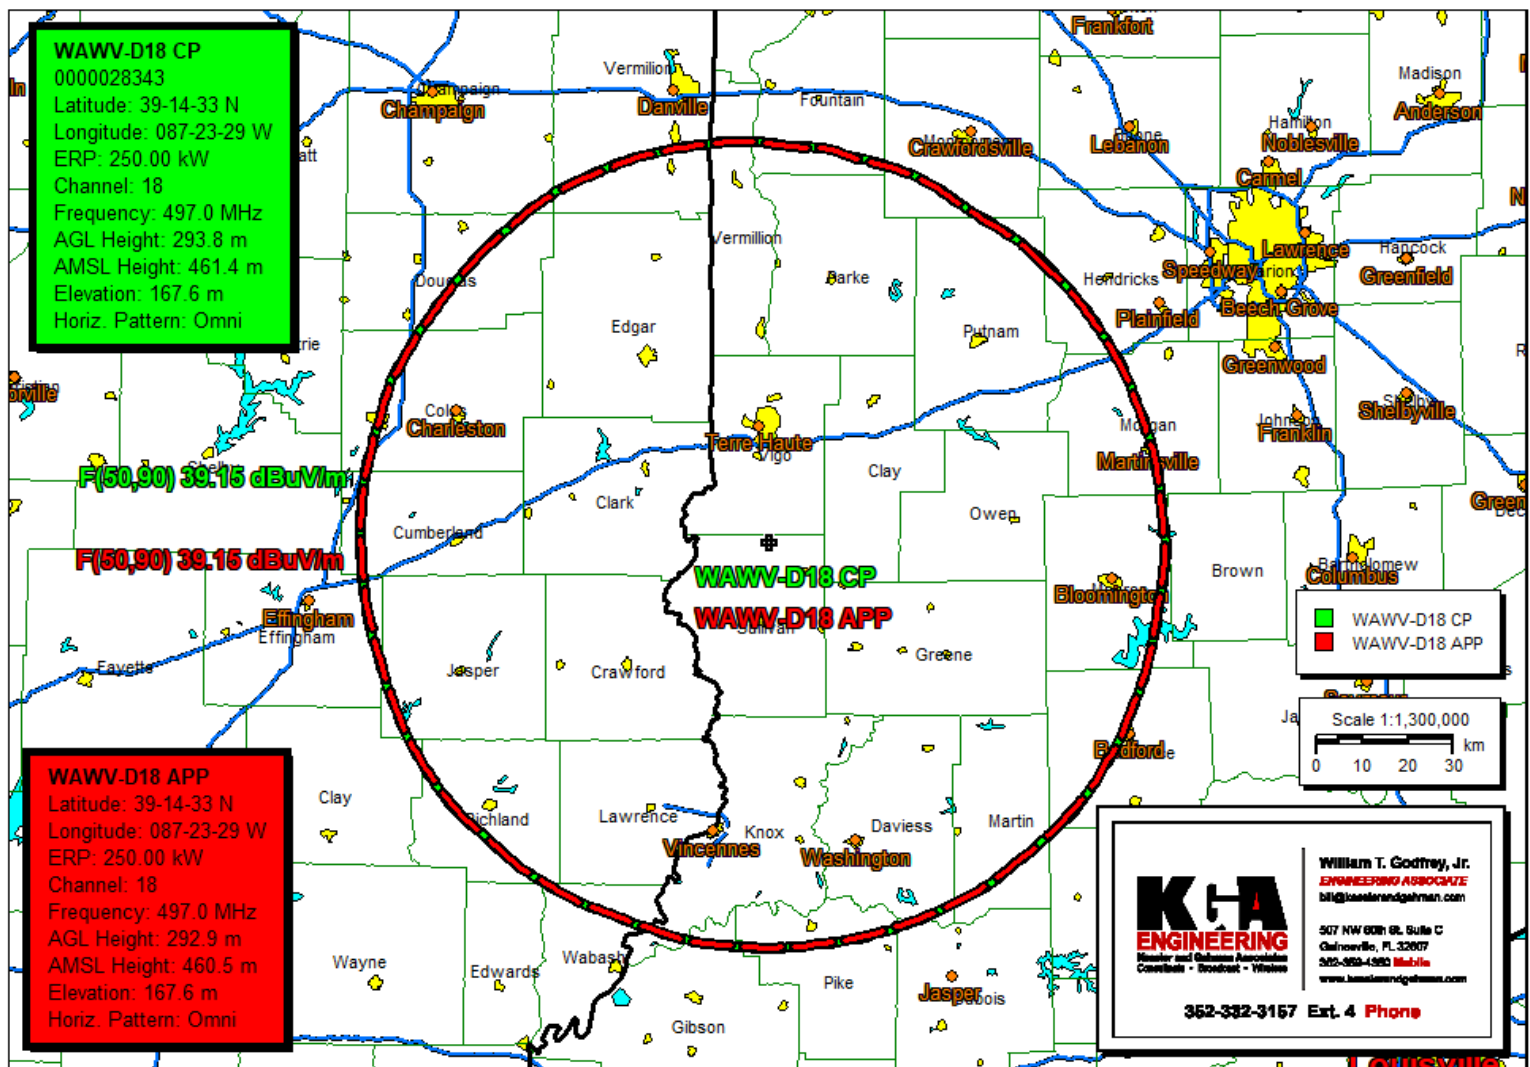

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida. As a Professional in the field

of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.
