Mr. Best

This email is on response to your request to initially collocate W11DH to our Vertical Bridge tower site FL-5014 located at 6690 N. US 1 in Fort Pierce, FL ASRN 1050334.

In that Vertical Bridge is supplying resources to assist the move of W11DH to its site #5014, we have concerns regarding the ability for this tower site to support your proposed equipment in order to meet the current FCC DTV repack deadlines. This is due to the present poor condition of this tower due to it's age and proximity to the coast. We do not recommend that considerable resources be deployed to reinforce this tower. Rather than execute this relocation as step one of the two step process, Vertical Bridge believes a single-step approach is better. We believe that the proposed single step move to the 3771 Jennings Road site (site 5013) will have less impact on Vertical Bridge resources and the DTV Repack process.

As an alternative, this is your reasonable assurance that Vertical Bridge would look favorably into the colocation of W11DH at the Vertical Bridge tower site located at 3771 Jennings Road, Port St. Lucie, FL. Terms and conditions to be negotiated.

Please contact me when you are ready to proceed.

Thank you

Gary Hess
