

STA REQUEST

On October 14, 2019, Station W10BG-D, Mayaguez, Puerto Rico, experienced technical difficulties and unexpectedly ceased operations. It is believed that the station's transmitter was either struck by lightning, or experienced a power surge. As a result, it was necessary for the licensee to remove the transmitter, and ship it to the manufacturer for repairs. It is expected that the transmitter can be repaired, returned and reinstalled within the next six months. Therefore, Telecinco, Inc., respectfully requests that the FCC grant special temporary authority for Station W10BG-D to remain silent until May 1, 2020.
