

Online Public Inspection File

The station's 2018 annual EEO public file report inadvertently was not uploaded until February 15, 2019.

The station's issues/programs lists for the First Quarter of 2012 to the Fourth Quarter of 2017 were created each quarter and placed in the station's paper public inspection file in a timely manner. However, due to a misunderstanding the licensee was not aware that these issues/programs lists needed to be uploaded to the station's online public file by March 1, 2018. Instead, the licensee believed that such materials should be retained in paper form at the station's studio. With the exception of the issues/programs list for the Second Quarter of 2012 (the "2Q 2012 List"), which was prepared and timely inserted in the paper public file but has gone missing from the file and cannot be re-created, the quarterly issues/programs lists have been available for public inspection during regular business hours at all times during the relevant period. With the exception of the 2Q 2012 List, the station has now uploaded all of these issues/programs lists to its online public file.
