**Online Public Inspection File**

The University of Georgia, licensee of noncommercial educational radio station WUOG(FM), Athens, Georgia, reports the following with regard to the timely placement of a document into the station's online public inspection file. Although the WUOG(FM) online public inspection file is complete, one (1) of the station's quarterly issues and programs lists was uploaded late to the file during the current license term. As the University was in the process of uploading its third quarter 2019 issues and programs list for WUOG, it noticed that the second quarter 2019 issues and programs lists was not present in the public file, and thus also added it at that time. The second quarter list was timely prepared by its deadline, and station staff believes that it timely uploaded the list when due as of July 10, 2019, but given that it could not find documentation in the public file of the submission, it rectified the situation as soon as it noticed the error and provides this explanation.

The University of Georgia regrets the brief delay in the appearance of this one item in the online public inspection file for WUOG(FM). However, the University has already ensured that its online public file is now complete with all required materials and, under the circumstances, does not believe that the issue is likely to recur. Accordingly, the University respectfully submits that its public file has been substantially compliant over the course of the current license term.
