STA Extension Request

LSB Broadcasting, Inc. ("LSB") requests an extension of the special temporary authority ("STA") in LMS File Number 0000074609, which expires on December 25, 2019. The STA allows LSB to operate KVHP-LD under its displacement parameters with reduced power.

As previously stated KVHP-LD was granted a displacement application to change channel to Channel 34 with an increase in ERP to 15 kW (see, FN 000054538, expiring August 20, 2021). Additionally, KVHP-LD received a letter notification of potential interference from T-Mobile and consequently, focused its attention on clearing the 600 MHz band. Although T-Mobile subsequently notified KVHP-LD that it was no longer required to cease operating on Channel 44, the plans and resources were already committed. KVHP-LD requested authorization to operate on Channel 34 with power reduced at 7.8 kW, until additional work could be completed to reach the authorized ERP.

KVHP-LD has been advised that the power at the site cannot be increased until an electrical modification is completed. The site owner advises that the required electrical modification cannot be completed until the first quarter of 2020.

In light of the foregoing, LSB requests an additional six-month extension of the special temporary authority to operate on Channel 34 with power reduced at 7.8 kW. Grant of this request allows KVHP-LD to continue operating without interruption of service to the public.
