

***APPLICATION FOR CONSTRUCTION PERMIT***  
***DIGITAL COMPANION CHANNEL***

---

W30BD – COLUMBUS, GEORGIA  
CHANNEL 334

DIGITAL NETWORKS–SOUTHEAST, LLC

DECEMBER 2019

## **APPLICATION FOR CONSTRUCTION PERMIT**

The following engineering statement and attached exhibits have been prepared for **Digital Networks-Southeast, LLC** ("Southeast"), licensee of analog low power television station W30BD at Eufala, Alabama, and are in support of their application for construction permit for a new digital companion channel low power television facility at Columbus, Georgia. The Facility ID for W30BD at Eufala, Alabama is 58773. The license for that facility is under FCC File No.BLTTL-19960628JF.

W30BD operates as an analog low-power television station on channel 30 with a maximum effective radiated power of 1.0 kW at a center of radiation of 182 meters above mean sea level utilizing a directional antenna. The proposed digital companion channel would operate on channel 34 with a maximum effective radiated power of 11.6 kW at a center of radiation of 134.1 meters AMSL using a composite directional antenna system. This antenna system consists of four Kathrein-Scala PR-TV antennas, two of which are oriented at 15 degrees true and two of which are oriented at 200 degrees true.

The proposed 51 dBu F(50,90) service contour from the digital companion channel facility would overlap the licensed 74 dBu F(50,50) service contour from the licensed W30BD analog facility. Additionally, the proposed transmitter site for the digital companion channel is located within 30 miles (48.3 kilometers) of the licensed analog site. The contour map in Exhibit E-1 illustrates these constructs.

**12.12.2019**

**2**

The proposed technical parameters would not result in interference to other proposed, authorized, or licensed facilities in excess of that permitted under the Commission's Rules. Exhibit E-2 provides tabular output from *TVStudy*. This study demonstrates no interference check failures.

The proposed facility would not constitute a significant environmental impact, and is exempt from environmental processing. The proposed antenna would be mounted to an existing tower that is registered with the Commission. The addition of the antenna to this tower would not increase the existing environmental impact already present from the tower.

Using the equations in Supplement A of *OET Bulletin 65*, the calculated worst-case power density at ground level assuming a downward radiation relative field of 0.2 is  $19.1 \mu\text{W}/\text{cm}^2$ . This value is less than the upper limit of the uncontrolled environment condition upper limit. Southeast certifies that it will coordinate with all other users of the site to ensure that workers and other personnel are not exposed to levels of radiofrequency radiation in excess of the applicable safety standards. Coordination activities will include, but are not necessarily limited to, a reduction in transmitter power or cessation of operation.
