

**W41DB, Corning, New York (Facility No. 128780)  
Request for Special Temporary Authority**

**JUSTIFICATION FOR SILENT STA**

By this filing, Vision Communications, LLC ("Vision") respectfully requests authority for the silent operation of W41DB, Channel 41, Corning, New York ("Station").

The Station is licensed to operate on Channel 41, which is in the 600 MHz band that has been re-allocated to T-Mobile for its commercial uses. Because the Station has been displaced by T-Mobile, the Commission issued a construction permit to Vision, authorizing the Station to change channels to Channel 15 (File No. 0000052737, the "Displacement Permit"). However, Vision has not yet built out the facilities set forth in the Displacement Permit.

Accordingly, grant of Special Temporary Authority is necessary to confirm the Station's silent status. Vision will advise the Commission when the Station has commenced broadcasting on its new channel pursuant to the Displacement Permit.
