

## **WUNM-TV Transition Plan Progress Report**

On December 23, 2019, WUNM-TV began operating its full power final post-transition facility. As a result, on December 24, 2019, WUNM-TV submitted a license application, LMS File No. [0000094088](#), for the final WUNM-TV post-transition facility. Previously, WUNM-TV ceased operation on its pre-transition channel and began operating on its post-transition channel, channel 28, on December 10, 2019. On that day, WUNM-TV utilized a temporary interim facility as authorized in the special temporary authority application in LMS File No. [0000092732](#).

While the WUNM-TV repack transition project has progressed to a point to allow for the license application for the final WUNM-TV facility to be submitted, more tasks are required to be performed before the overall repack project can truly be considered completed. Some of those tasks include the proper disposal of the pre-transition main transmitter, installation of the auxiliary transmitter, completion of general construction tasks, and the state inspectors' approval of work performed at the site.

UNC-TV will be submitting additional budget updates for FCC Form 399. Among other things, these updates will reflect cost revisions for the general contractor costs, transmitter installation, and professional services pricing. UNC-TV will also continue to submit FCC Form 399 reimbursement requests in a timely manner as it receives invoices that qualify for reimbursement.

A copy of the project schedule / timeline for the WUNM-TV transition project is included with this transition report. Of course, UNC-TV reserves the right to update the project schedule / timeline as warranted to account for changes that may occur during this fluid process.
