

Online Public Inspection File

WTSM(FM), 97.9 MHz, Woodville, Florida, Facility Id No. 89051 (the "Station") was the subject of a "long-form" transfer of control approved via Form 315 that was consummated as of August 26, 2013. See FCC File No. BTCH-20130529AQL. Consequently, the certifications and responses in this renewal application are based on the period starting on August 26, 2013 through to the present. See INSTRUCTIONS – FORM 2100, SCHEDULE FCC 303-S – RENEWAL OF BROADCAST STATION LICENSE (March 2019 edition) ("if the station license was assigned or transferred during the subject license pursuant to a 'long-form' application on FCC Form 314 or 315... the renewal applicant's certifications should cover only the period during which the renewal applicant held the station's license.").

As a "radio station not in the top 50 Nielsen Audio markets" or as a "radio station with fewer than five full-time employees," the Station was not required to transition to its online public inspection file until March 1, 2018. See 47 C.F.R. Section 73.3526(b)(2)(i).

Note the following regarding the "No" response to this certification: "Licensee certifies that the documentation required by 47 C.F.R. Section 73.3526 or 73.3527, as applicable, has been uploaded to the station's public inspection file as and when required."

For public file documents generated before the online transition date, the Licensee uploaded the required documentation to the Station's online public inspection file on or before March 1, 2018, with the exception that certain of the Station's Annual EEO Public File Reports were not uploaded until March 20, 2018. Other than that minor delay, the Licensee did, and has, for the period starting with the transfer of control consummation (August 26, 2013) through to the present, uploaded the documentation required by 47 C.F.R. Section 73.3526 to the Station's public inspection file as and when required.
