

WKWR (Key West, FL) Narrative

During the subject license term, WKWR (FM), Key West, Florida was forced off the air twice due to technical issues. In the first instance, the silent status was due to the need to make substantial technical repairs and replacements. In the second instance, a hurricane which hit the area caused significant damage to the station's facilities and required substantial technical repairs.

Specifically, WKWR was silent for the following time periods:

May 6, 2014 through March 25, 2015
September 8, 2017 through May 6, 2018

As the Commission's records will reflect, the licensee's Silent STA Requests were timely filed and granted by the FCC's staff (and timely Resumption Notifications were filed).
