

Request for Reduced Power Notification

DTV America Corporation ("Licensee") respectfully notifies the FCC of a Reduced Power Notification while it repairs this Low Power Television ("LPTV") station. The FCC has a history of granting such requests, particularly where, as here, the request is supported by good cause and granting it would further the public interest.

Engineers have identified a defective filter which has resulted in the station running at reduced power. The Licensee has ordered a replacement filter and is working diligently to facilitate the repair as soon as the filter is received.
