

Engineering Statement
Reduced Power Operation
CBS Television Stations Inc.
WFOR-TV Miami, Florida
Facility ID 47902

CBS Television Stations Inc. (*ViacomCBS*), licensee of WFOR-TV, Miami, FL (the “Station”) is replacing the Station’s transmitter. Due to logistical challenges, a portion of the present transmitter must temporarily be disconnected to facilitate construction. As a consequence, WFOR-TV began operating with 50% of the licensed 1,000 kW effective radiated power (ERP) on December 16, 2019. At this power level, continued principal community coverage of Miami, FL is assured.

Initial projections that work could be completed in 30 days or less have been proven unrealistic. Due to minor complications common in any project of this magnitude, it is now necessary for *ViacomCBS* to request Special Temporary Authority to continue operation at 50% ERP for up to an additional 30 days, until February 14, 2020. However, we anxiously anticipate restoring full-power operations even sooner, which is clearly in the best interest of both *ViacomCBS* and WFOR-TV’s viewers.
