

**Non-Quarterly Transition Progress Report for WUNU  
(5 Days After Termination of Pre-Auction Channel Operations)**

This Transition Progress Report is being filed for the sole purpose of providing notification that WUNU's pre-transition channel operations ceased on the Phase 7 deadline of January 17, 2020.

WUNU commenced its post-transition operations utilizing its post-transition auxiliary facilities (as outlined in its Auxiliary Construction Permit, LMS File No. [0000080190](#)) on an interim basis. A license application (LMS File No. [0000098031](#)) has been submitted for the WUNU auxiliary facility currently in use.

Because WUNU commenced its post-transition operations using interim facilities, quarterly Transition Progress Reports will need to be filed until the station's full repack facility is complete. Thus, a more robust discussion of the current status of construction and anticipated timeline for completion will be provided in the next quarterly report which is due April 10, 2020.
