

Amendment to WSYM 387 “10 days after...” Filing

The WSYM 387 filing for “10 Weeks before the end of assigned construction deadline for the station” was inadvertently filed as the update for “10 days after the construction of the post-auction facilities have been completed”. The form has been amended to provide the status of the station as of ten days after construction was completed and a new, separate filing has been made for the required “10 weeks before...” update.
