

Notice of Reduced Power Operations

Pursuant to Section 73.1560(d) of the FCC's Rules, Greenville (KTXD-TV) Licensee, Inc., licensee of KTXD-TV, Greenville, TX (Facility ID 42359), hereby notifies the FCC that the station has been operating at reduced power since February 17, 2020. Following routine transmitter readings, station personnel discovered a problem with the switch that feeds to the station's broadcast tower which, left unrepaired, could cause major damage to the station's facilities. The faulty switch was removed and sent out for repairs. While the station waits for the switch to be repaired and returned, it will operate on a backup transmitter with an output power of less than 80% of authorized power. At this time, the licensee estimates that it will be able to resume licensed operations on its main transmitter in approximately two weeks. The licensee will notify the Commission when it is able to resume operations at authorized power or will file a request for special temporary authority if reduced power operations will exceed 30 days.
