Special Condition 4 – Warning Signs

Special condition 4 of the Construction Permit states:

Warning signs which describe the radiofrequency electromagnetic field hazard must be posted at appropriate intervals. Access must be restricted to prevent the exposure of humans to RF emissions in excess of the FCC guidelines (OET Bulletin 65, Edition 97-01, released August 1997). Permittee shall submit documentation of compliance with this special operating condition when filing FCC Form 302, application for license.

Applicant has complied with this requirement by placing warning signs at approximately three feet above ground level at 4 locations around the perimeter of the tower at a distance of approximately 30 meters from the base of the tower.

A warning sign has also been placed on the tower structure itself.
