

### **Contemporaneously filed and contingent applications of WVIJ and WMYE**

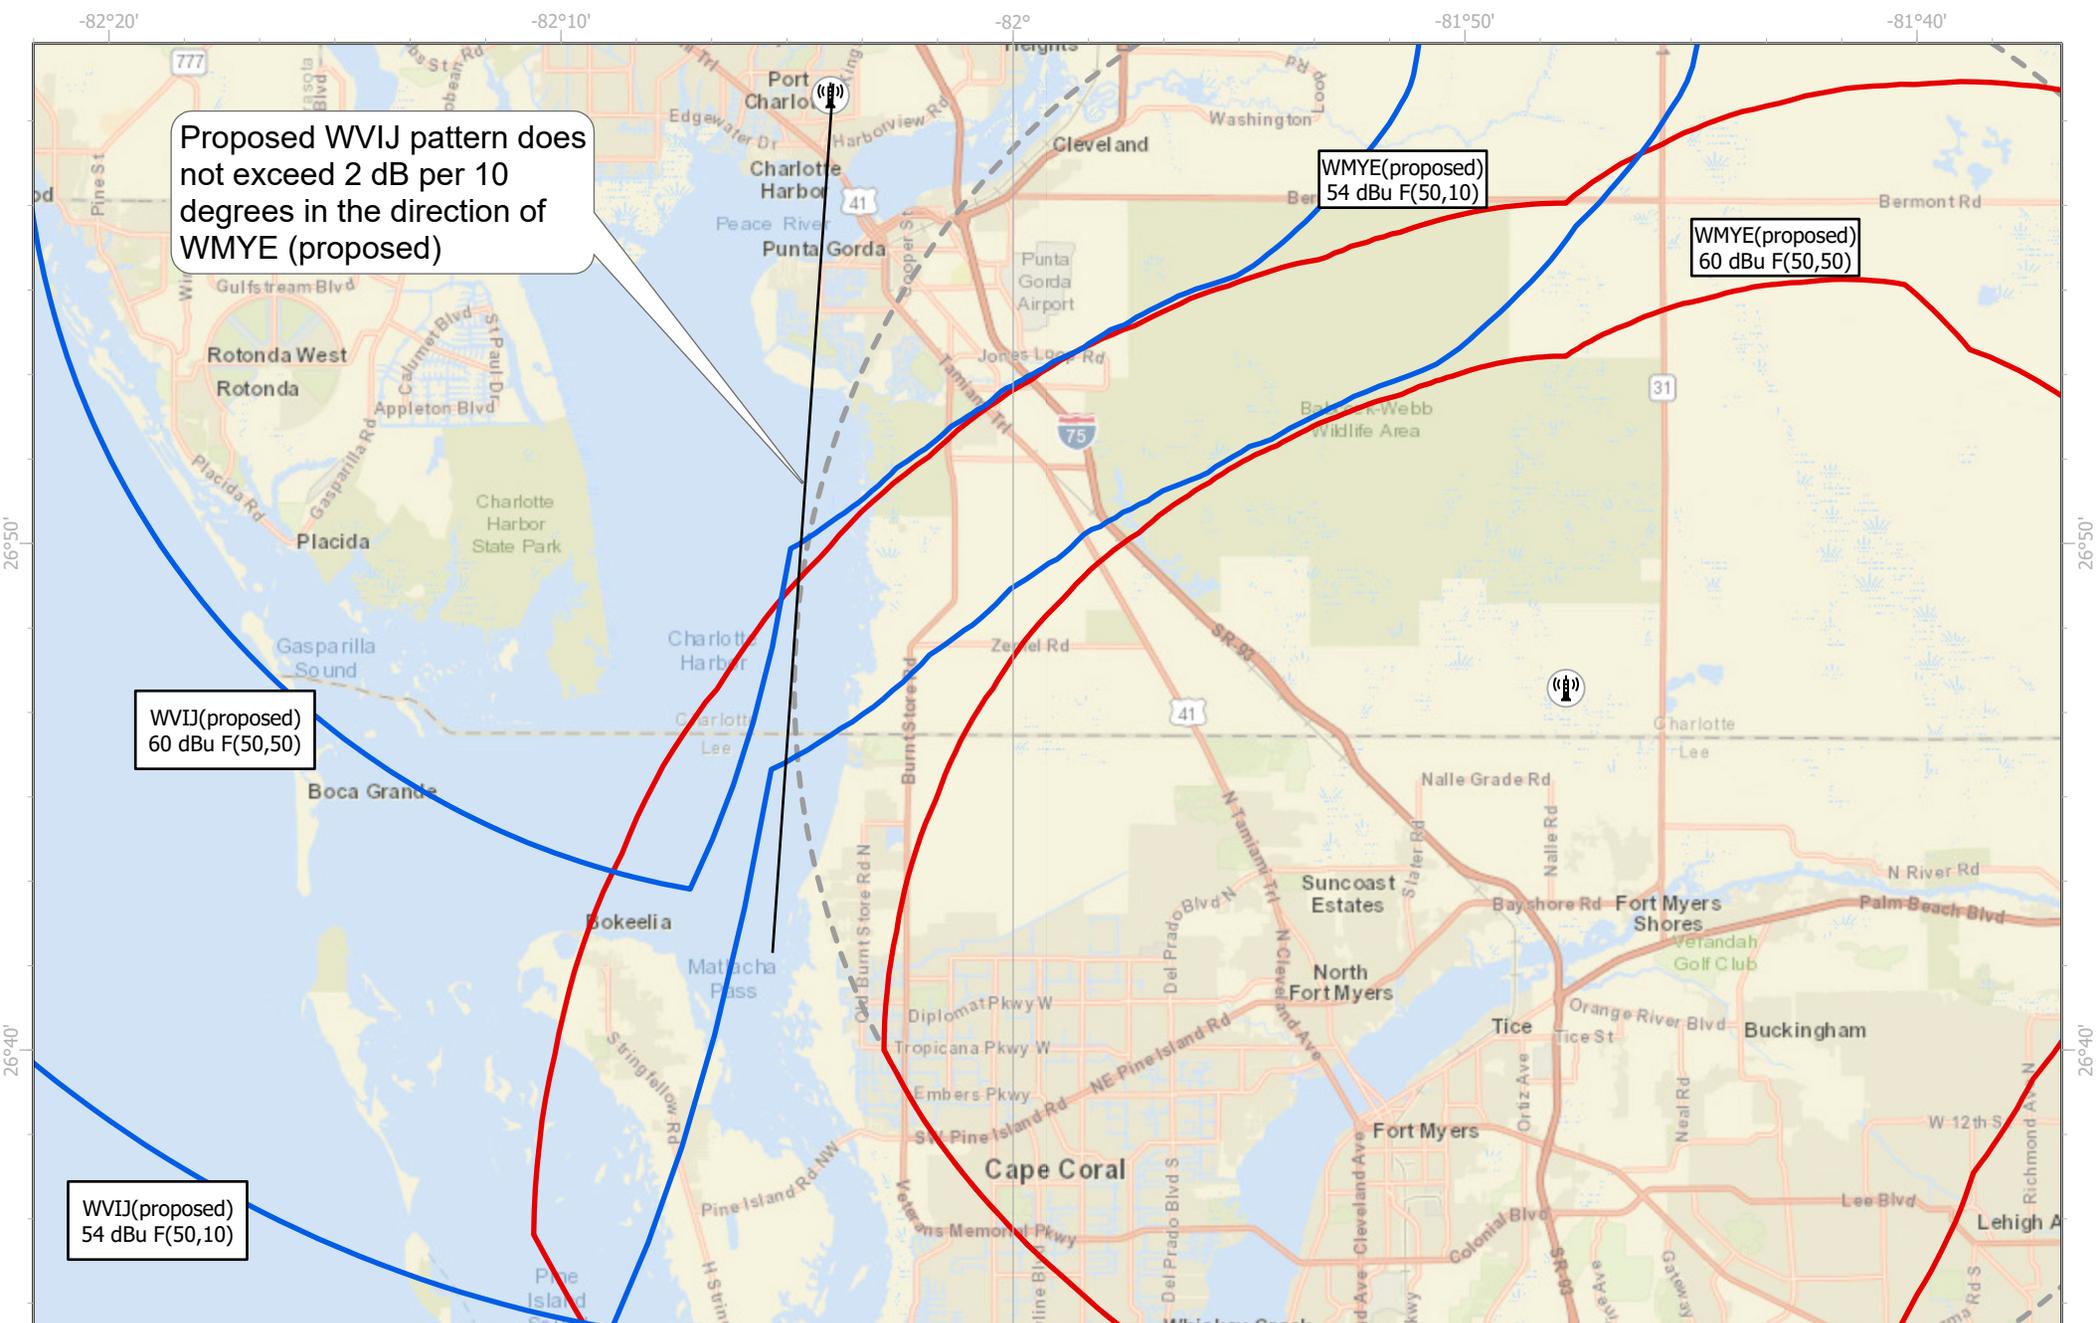

PORT CHARLOTTE EDUCATIONAL BROADCASTING FOUNDATION (WVIJ) and CALL COMMUNICATIONS GROUP, INC. (WMYE) have contemporaneously filed facility modification applications for WVIJ and WMYE seeking construction permits to modify both facilities. The proposed facilities are contingent upon the approved modification of the other facility.

WMYE's proposed modification is contingent on WVIJ's prior modification.

The licensee of WMYE proposes reimbursement for the reasonable costs incurred in the construction of the proposed WVIJ facility including the necessary equipment such as the antenna, transmission line, hardware, transmitter, and installation costs.

The construction of the proposed WMYE facility would be conditioned upon the successful construction of the WVIJ facility.

There is no formal agreement between WVIJ and WMYE and neither party is obligated to construct either facility. However, both parties agree that the successful grant of construction permits for the proposed facility modifications is a prerequisite to pursuing a formal agreement and proceeding to construct both modified facilities.
