Subject: NBC Stations Take Note - E/I Problem

One of our NBC stations told me that the episodes of "Earth Odyssey" that aired on Saturday, November 30th aired without the E/I bug.

Our FCC lawyer advises that if this applies to you that we should air the episodes prior to the end of 4th Quarter.

My understanding is that NBC refed the episodes about an hour ago - not sure if anyone recorded them. If you did, you might want to send a reply all so that stations who did not record them have somebody to try and get copies from.

Let me know if you have questions.
