ENGINEERING STATEMENT IN SUPPORT OF APPLICATION FOR CONSTRUCTION PERMIT TO MODIFY COORDINATES & RC AMSL
PREPARED ON BEHALF OF MARQUEE BROADCASTING KENTUCKY, INC.
WNKY(TV) CH 24 BOWLING GREEN, KENTUCKY
March 2020

This application is submitted to reflect a change in tower coordinates and ground elevation as reflected in FCC ASR 1314085. No other changes to the licensed facility are required or proposed.

FCC TVStudy software was used to evaluate the updated CH 24 facility and determine that there is no impermissible caused interference.

The existing antenna system consists of an ERI model ATW12H3-ESPX-24H, directional, elliptically polarized, antenna. The maximum relative field in the elevation pattern across the depression angle range of 10 to 90 degrees is less than 0.15 with a radiation center 142.3 meters above ground. Utilizing formula 10 OF OET Bulletin No. 65, Edition 97-01, a value F of 0.15 has been used to calculate the power density 2 meters above ground. The maximum power density is 4.46 uw/cm squared calculated for an ERP OF 90,000 watts H. polarization and 27,000 watts V. Pol. This value is 1.3 % of the Public Exposure MPE per section 1.1310. Based on this analysis it is believed that the proposed facility is in compliance with OET-65 Guidelines.

The applicant will reduce power or cease transmission as required to meet FCC OET-65 Guidelines.

The proposed tower is at an existing site with, building, access road and power. Access to the site is restricted to authorized personnel. There are locked gates at two locations and a new eight foot fence with barbed wire strands atop is to be constructed to further restrict access to the tower.

Below is a copy of the TVStudy interference analysis for CH 24 based on the licensed 90 kW ERP with DA antenna.

Report
