

## WIFX-FM

### EXPLANATION OF WIFX-FM PUBLIC FILE COMPLIANCE

WIFX-FM was late in adding public file material to the FCC's on-line public file system, but has completed the uploading. Specifically, certain issues/programs lists were not timely uploaded but are now present on the online public file site.

A primary explanation for the licensee's delay in uploading the required online public file information was the death of Rebecca Walters, who dealt with regulatory filings and responsibilities for this station.

The station operates in a very small, and financially-distressed market which requires a minimal staff to operate and maintain the station on-air which, along with the sudden loss of Ms. Walters, has resulted in delay in understanding the requirements and getting the lists uploaded to ensure compliance.

We have, however, in recent months been able with assistance to upload our online public file, and we will continue to maintain the file. Included was reconstructing and adding issues/programs lists that had been missing into the on-line file. All Issues/Program lists have now been uploaded to the station's online public file.

The station now has put in place procedures to ensure continuing proper uploading of the issues/programs lists on a timely basis and have a calendar approach to help in this effort.
