

TECHNICAL SUMMARY
REQUEST FOR SPECIAL TEMPORARY AUTHORITY (STA)
TV STATION WGNM
MACON, GEORGIA
CHANNEL 45 21 KW (MAX-DA) 222 m

1. The instant request is for Special Temporary Authority (STA) for WGNM, Macon, Georgia, which is licensed for operation on pre-auction channel 45.¹ The WGNM STA facility will operate on channel 45 with a directional antenna side-mounted at a height of 183 meters (600 feet) above ground level on WGNM's current tower. There will be no change in the overall structure height of the existing tower (ASRN 1045776).

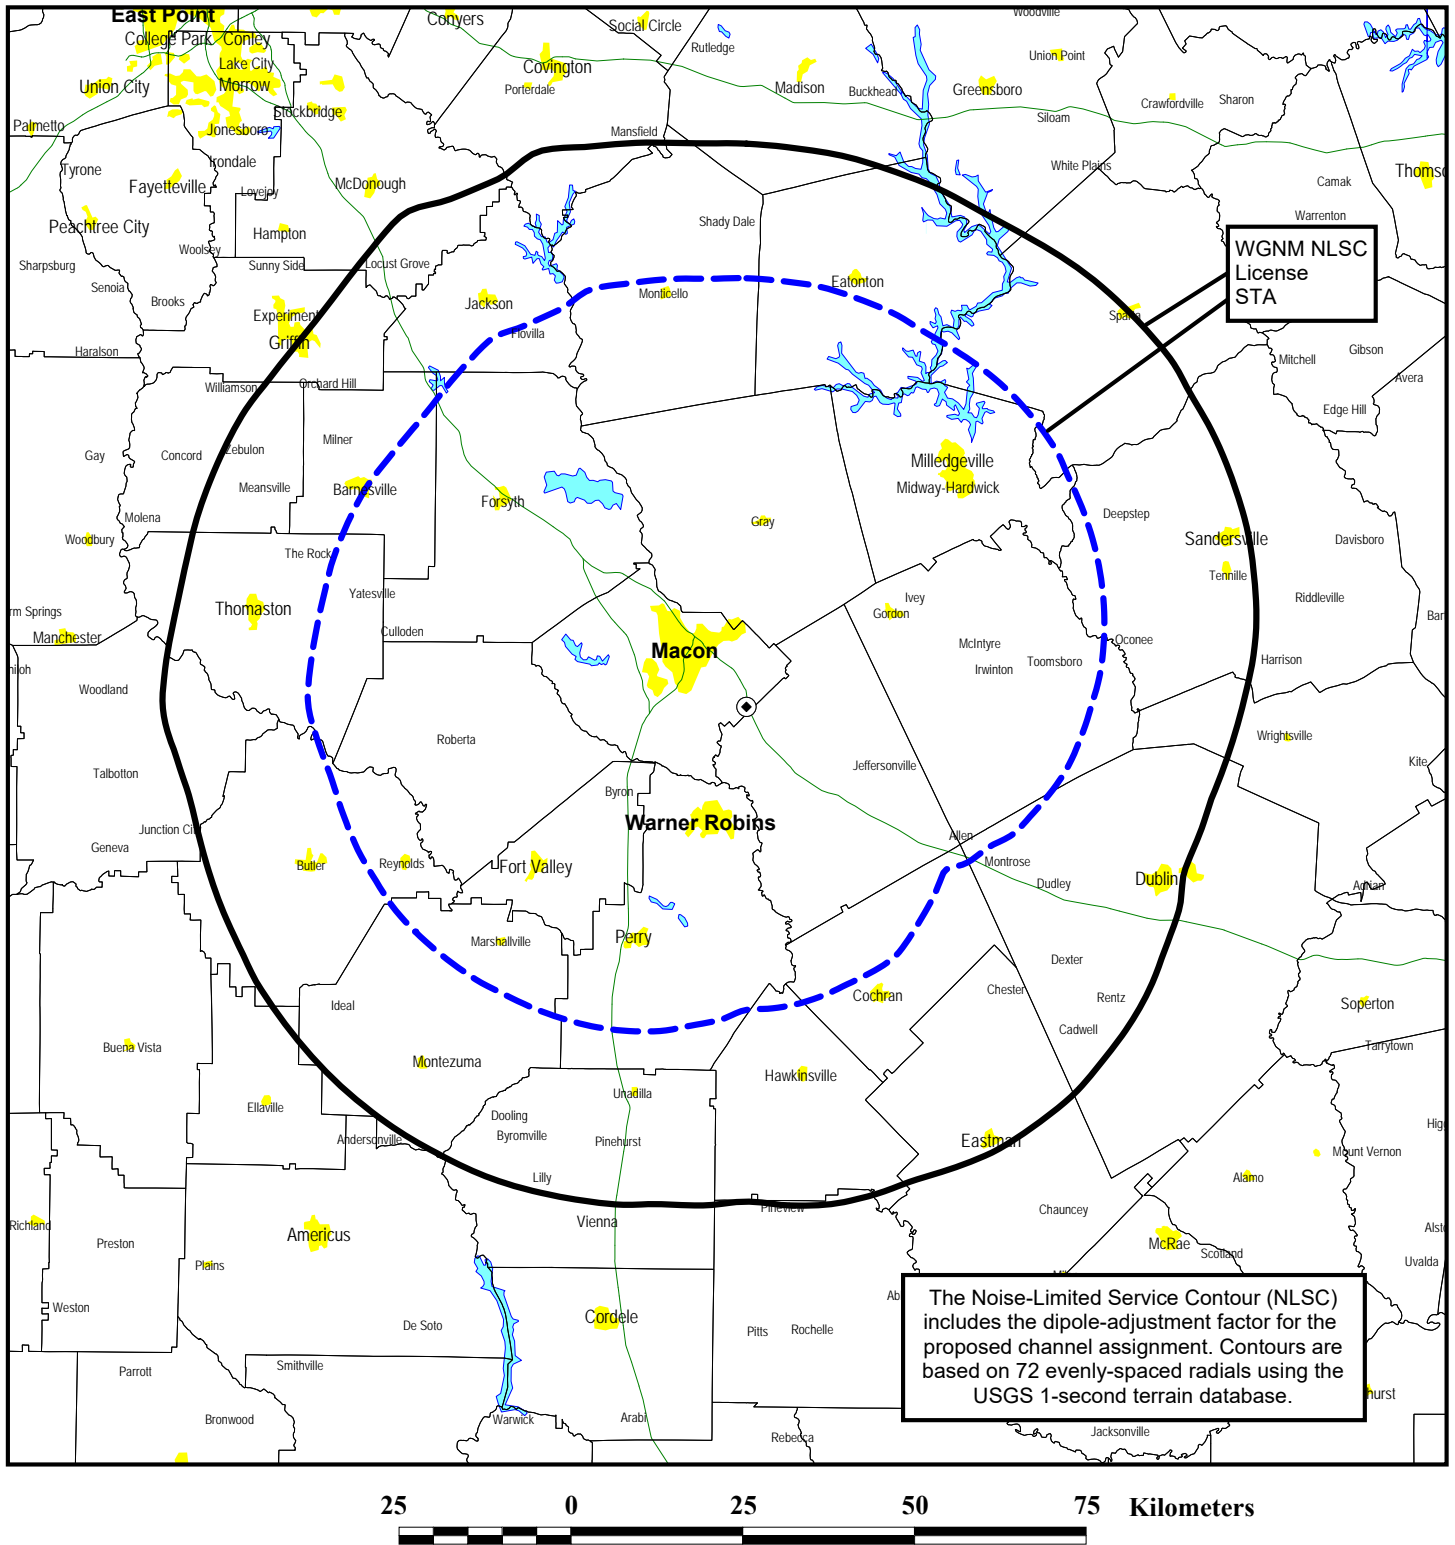

2. There will be no extension of the predicted noise-limited service contour of the STA facility beyond that of the main facility (see Figure 1 attached).

3. RFR Compliance: The proposed facilities were evaluated in terms of potential radiofrequency radiation (RFR) exposure at ground level to workers and the general public. The radiation center for the proposed DTV antenna will be located 183 meters above ground level. The total DTV ERP is 21 kW (horizontal polarization). A worst-case vertical plane relative field value of 1.0 is presumed for the antenna's downward radiation (for angles below 60 degrees downward). The calculated power density at a point 2 meters above ground level is 21.41 uW/cm² which is 4.87% of the FCC's recommended limit of 439.3 uW/cm² for channel 45 for an uncontrolled environment. Therefore, based on the responsibility threshold of 5%, the proposal will comply with the RF emission rules.

Access to the transmitting site is restricted and appropriately marked with RFR warning signs. Furthermore, as this is a multi-user site, a formal RFR protection protocol is in effect in the event that workers or other authorized personnel enter the restricted area or climb the tower to ensure that appropriate measure will be taken to assure worker safety with respect to RFR exposure. Such measures include limiting the exposure time, wearing protective clothing, reducing power to an acceptable level or termination of transmitter output power all together until workers leave the restricted area.

¹ See FCC File No. BLCDT-20050621CRQ.
