

**RF Exposure Statement
WOFL Orlando, FL
Repacked Channel 33**

The facility proposed in this application is identical to the replicated post Incentive Auction facility described in the repacking notification sent to the station with a dipole adjusted effective radiated power (ERP) of 770 kW and a center of radiation 441 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicate that the RF exposure level is less than 0.1% of the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
