RE: License Renewal, Section II, Para. 4 of Form 303-S

On or about May 20, 2019, the licensee received a Notice of Violation regarding spurious emissions by FM translator station W274AY, Deltona, Florida. The attached response was mailed to the FCC's Enforcement Bureau. As reported in the response the licensee installed, at an expense of several thousand dollars, various filters which, when tested, showed there was no longer a question of spurious emissions by the translator. We have not received any further communication with the FCC. I spoke with the field agent, Michael Mattern, and he assured me that he has closed the case with no further action required.

Bill Powell
President
