

Jackson Telecasters, Inc. – WDEF-FM
Renewal Application
On-Line Public File Exhibit

Throughout the license term, the licensee has diligently completed and filed its ownership reports in compliance with 47 C.F.R. Sec. 73.3615. Those reports have consistently included a detailed list of the organizational documents, contracts, and other agreements relevant under 47 C.F.R. Sec. 73.3613.

As part of a recent review of its public file, the licensee discovered that the on-line file currently lacked either actual copies of those documents or a list of the documents, as now allowed by 47 C.F.R. Sec. 73.3526. (The licensee reviewed its previous paper version of the public file, which was used for much of the renewal term prior to the March 2018 effective date of the on-line public file requirement, and found that the paper file had included a list of relevant organizational documents, contracts, and other agreements.) Upon discovery that an on-line list was missing, the licensee acted diligently to prepare a list and uploaded it to its online public file.

The licensee has experienced minimal political advertising activity - only 27 “buys” in the last two years. Review of the public file during renewal preparation showed that the uploaded political records were substantially complete, including political order forms detailing charges and the dates and dayparts of the orders. In this small number of “buys,” the licensee’s records did not in every case clearly indicate the “class” of time purchased or the date and time that the spots ran. The licensee has since come into material compliance by uploading invoices.

With the changes noted in this exhibit, the licensee now believes that its public file is complete.
