

### Reduced Power Statement

WAVE is and has been operating since on or around December 12, 2019 at reduced power at the parameters authorized by its licensed auxiliary antenna (File No. 0000087083). WAVE experienced a failure of its main antenna for its primary facility on or around December 12, 2019, which required the station to switch to its auxiliary antenna. WAVE has been unable to reinstall the repaired antenna because of tower crew cancellations relating to COVID-19 and therefore anticipates continuing to operate with its auxiliary facility for the next several months.
