**W291CZ Boston, MA - Facility ID: 144592**  
**Fill In Translator for WRCA AM Facility ID: 60695**  
**Minor Modification of Construction Permit BPFT-20180404AAL**

**47 C.F.R. Sections 74.1204, 74.1205, 74.1232, 74.1234, 74.1235**

This application for a minor modification of Construction Permit is to move the licensed antenna up 4 meters in height at its existing transmitter site. A corresponding reduction of the effective radiated power to 96 watts from the licensed 99 watts creates the exact same coverage area as is presently licensed, as shown on the attached coverage map.

**Inasmuch as the proposed coverage replicates the licensed coverage there are no allocation or protection changes proposed, and no further exhibits are necessary to show compliance with applicable rules.**

**47 C.F.R. Section 1.1306**

A Commission grant of Authorization for this location would not be an action which will have a significant environmental effect. The proposed translator antenna will be placed 11 meters above the building rooftop. The ERP is less than 100 watts. Therefore the translator is categorically excluded from further environmental review under 1.1307(b), Table 1, of the FCC Rules and Regulations. The permittee/licensee in coordination with other users of the site will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
