Reference station has protected zone issue: Canada
 % = Station fails 73.215.
 RSV-R = reserved - needs protection, RSV-A = allocation.

The proposed facility is a class B1 grandfathered short-spaced station (as defined in 47 C.F.R. 73.213) serving Westborough, MA on channel 297.

The distance between the proposed facility does not meet separation requirements of 47 C.F.R. 73.207(b) for third-adjacent WXKS-FM, channel 300B, Medford, MA and third-adjacent WMJX, channel 294B, Boston, MA.

However, according to 73.213(a)(4), there are no distance separation or interference protection requirements with respect to second-adjacent and third-adjacent channel short-spacings.

Therefore, the proposed facility is in compliance with the spacing requirement to these facilities.
