

## NONIONIZING RADIATION COMPLIANCE

### Positive Radio Group

Positive Radio Group has conducted an engineering statement regarding non-ionizing radiation exposure issues associated with the environmental effects certification on the FCC Form 303-S for the license renewal applications for the following station:

<b>Station</b>	<b>Facility ID #</b>	<b>Community of License</b>	<b>Application File #</b>
WTGR	15169	Union City, Indiana	BLH-19941118KA
WMPO-AM	18021	Middleport-Pomeroy, OH	BL-20070829AEB

A detailed review found that the non-ionizing radiation certification included in the above referenced renewal or modification application for each station remains valid since there haven't been any subsequent changes in the vicinity of the transmitter site which would adversely impact this certification.
