

PURPOSE OF PRE-AUCTION ENGINEERING STA

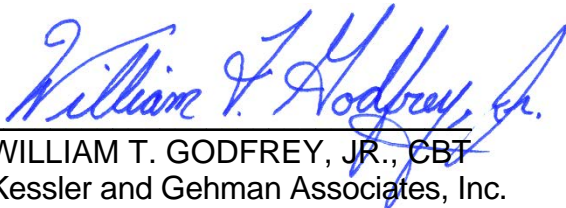

The purpose of this Engineering STA application is to allow the WLAX-DT facility to temporarily operate with reduced parameters on its pre-auction channel (17) using the main pre-auction antenna, transmission line and a 1.3 kW back-up transmitter while the main pre-auction transmitter is shut down and removed to make room for the new post-auction main transmitter. The proposed WLAX pre-auction interim facility will completely encompass its community of license with the F(50,90) 48.0 dBu principal community contour and will not exceed its licensed F(50,90) 39.04 dBu pre-auction protected noise limited contour in any azimuthal direction (see showing below).

WLAX-D17 Pre-Auction License vs. WLAX-D17 Pre-Auction STA (Pre-Auction Main)

CERTIFICATION
