

## **Request For Special Temporary Authority**

Spanish Television of Denver, Inc., licensee of KCEC(TV), Boulder, CO, Facility ID No. 57219 (the “Station”) hereby requests special temporary authority (“STA”) to operate at variance from its current Phase 9 construction permit (“CP”) (File No. 0000063284).

On April 28, 2020, in anticipation of meeting its Channel 32 construction deadline of May 1, 2020, the Station filed for Program Test Authority pursuant to Section 73.1620(a) of the Commission’s rules (File No. 0000112841). In the course of reviewing data needed to prepare the required License to Cover application, the Station discovered that its as-built antenna radiation varied from the as-filed data underlying its current CP, on azimuth bearings from 230 through 280 degrees. Consequently, the Station has begun to prepare and will file a modification of its CP to increase the specified radiation in the pertinent directions. In the interim, the Station respectfully requests STA to operate its post-transition antenna at variance. Grant of this STA request is in the public interest because it would allow the Station to continue to provide service to the Denver television market while it otherwise completes its Phase 9 transition to Channel 32.
